

## “PS” Suction Strainers for Water and Petroleum Based Fluids

### Benefits

- Reliable, low-cost filtering of water-based and petroleum-based fluids, most coolants, some phosphate esters, lubricating oils, and other process fluids
- Can be used for straining water-based fluids and oil-based chemicals
- Stainless steel and plastic construction prevent rust

### Features

Nylon male (nipple with hex) and female (hex) used for easy installation of the one piece cap to provide strength and stability to hold the strainer body to protect the pump.

Designed as an in-tank strainer to be installed below the fluid level.

### Options

- 1/2" and 3/8" NPT female coupling
- 3/8" male NPT couplings

#### Part Number

PS-3/8-M-100

PS-3/8-F-100

PS-1/2-F-100
